

ETL Steps - Agile for SAP BW/4HANA®

bi-provider.com

ETL Steps is a Framework which facilitates the agile development in SAP BW/4HANA®

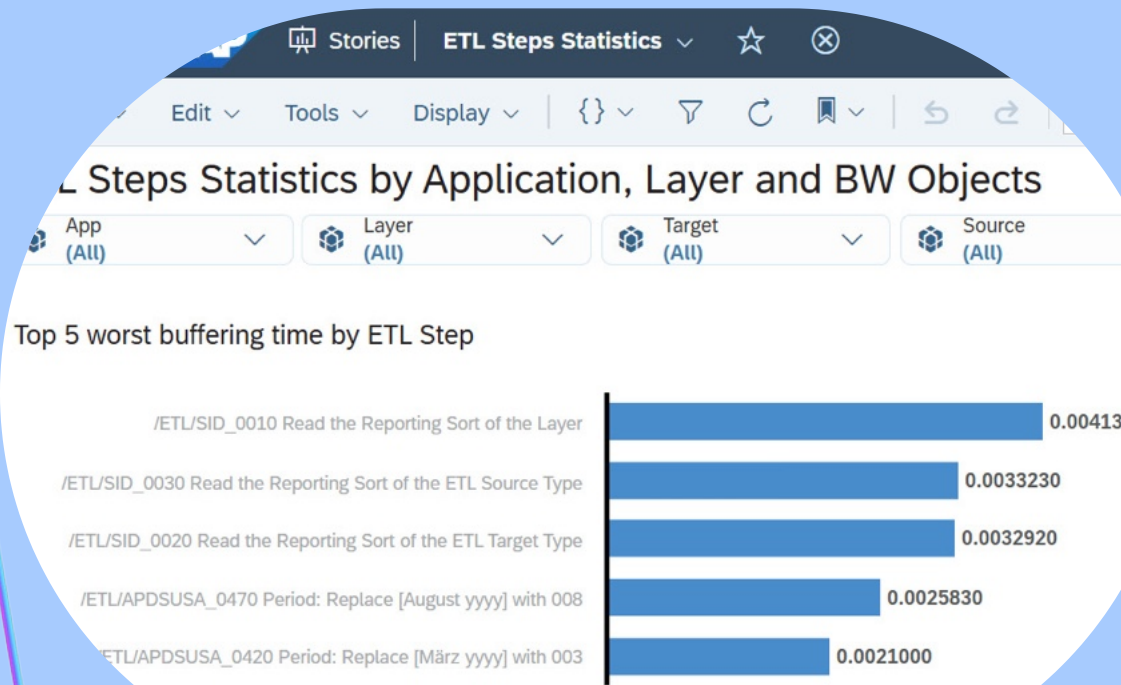

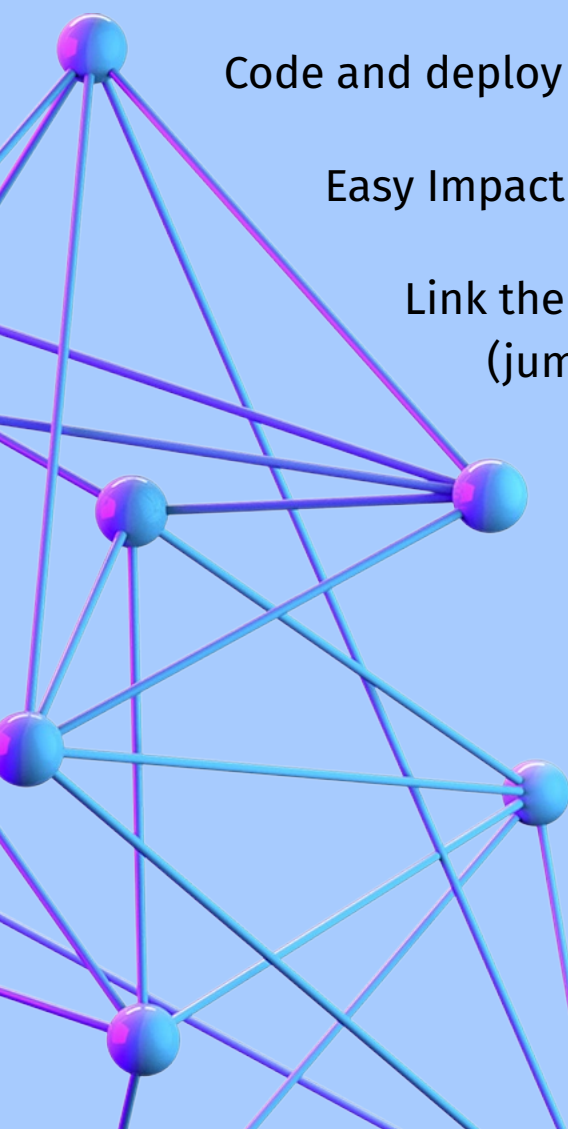

Unite all the SAP BW Project Team members in a common interface

See the implemented logic at once for entire BW process chains

Code and deploy now, use later: Time dependency of the ETL-Steps

Easy Impact analysis - Can I delete this Field or not?

Link the Code to the Requirements and the Documentation
(jump to Confluence, Jira or MS Planer/Teams-Task)

ETL Step ID	App	Layer	Status	Valid from	Valid to	Target	Source	Routine	Seq.No
/ETL/APDSUSA_0010 Fill the Record Number Field with an autonumber	DATEV online	Entry	active	01.01.1000	31.12.9999	/ETL/APDSUSA	/ETL/IS_DSUSA_IN	Start	00010
/ETL/APDSUSA_0020 Extract the Client Name from the header rows	DATEV online	Entry	active	01.01.1000	31.12.9999	/ETL/APDSUSA	/ETL/IS_DSUSA_IN	Start	00020
